

Gardens can transform our city!

Providing information and materials such as seeds, plants, and tools can help communities utilize urban greening and gardening to beautify and improve their neighborhoods.

Gardens, especially community gardens, can:

- Increase neighborhood property values
- Improve air and water quality
- Provide space for outdoor activities, education, and skill development
- Empower communities!
- Provide nutritious and delicious food
- Replace vacant land with productive, beautiful spaces

Become involved in CGRN today!
